* In all 435 congressional districts (excluding the District of Columbia and Puerto Rico), women who were employed in 2020 (including those who worked part-time or only part of the year) were typically paid less than men. In Puerto Rico, the margin of error is large enough and the earnings ratio is close enough to one that it cannot be said with at least 90 percent confidence that there is a gender wage gap.

Source for wage data: U.S. Census Bureau (2021), American Community Survey 5-Year Estimates 2020, Table B20017.
